ABOUT ME

Junior Software Engineer graduated from a CTI-accredited engineering school, with experience across 5 internships in Germany, England, and Tunisia. Skilled in full-stack development and Agile environments. Proven ability to design, develop, and optimize scalable applications.

EDUCATION

Engineering degree in Computer Science, accredited by the CTI and recognized by the European Commission. Esprit Tunisia	2022 - 2025
Bachelor degree in data analysis and big data ISIM Sfax Tunisia	2019 - 2022

SKILLS

SpringBoot, ExpressJS, Django, Symfony, .NET, Angular, React, Java, SQL, Odoo, Devops, GIT, jenkins, JUnit, Sonar, Mocha, Vercel, Nexus, Docker, Grafana, Prometheus, Jenkins, Jira, Linux, ISTQB, Odoo

PROFESSIONAL EXPERIENCE

Full Stack Developer

Desion GmbH - Automation company in Darmstadt (Germany, ~20 employees)

- Darmstadt, Frankfurt
- 09/2025 - 06/2026
- Cut page load times by 25% across 3 projects by refactoring legacy UI into a reusable, component-based architecture guided by Lighthouse performance audits.
 - Built scalable backend features in Python, ensuring clean, maintainable code that aligned with overall system architecture.
 - Collaborated in a fast-paced Agile team, actively contributing to daily sprints, rigorous code reviews, and comprehensive technical documentation.

Full stack developer Intern

Ausbildungsbasis - Startup

- Frankfurt (Remote)
- 12/2024 - 07/2025
- Redesigned the UI using Laravel Blade & Livewire, building a modern, responsive frontend architecture that accelerated delivery timelines and improved usability.
 - Maintained and optimized core features, ensuring high application performance, consistent UI design, and adherence to frontend best practices.
 - Collaborated in an Agile workflow via Jira, partnering with cross-functional teams

Full stack developer Intern

QuantStats

- England (Remote)
- 07/2024 - 09/2024
- Built a microservices-based football analytics platform using Spring Boot and Angular, enabling data-driven decision-making.
 - Integrated PostgreSQL for high-efficiency data handling and scalable backend performance.
 - Contributed to Agile development cycles and technical discussions to streamline feature delivery.

Data Analyst Intern

Poulina Group Holding

📍 Ezzahra, Tunisia 📅 07/2023 - 09/2023

- Developed a Power BI sales dashboard to centralize and visualize business data
- Performed ETL processes using SSIS and SQL Server
- Delivered insights to support strategic decision-making
- Improved reporting efficiency and data accessibility

Final Year Internship - Recognition of individuals from an ECG signal, ISIMS

📍 Sfax, Tunisia 📅 02/2022 - 06/2022

- Processed ECG data using filtering, segmentation, and peak detection techniques
- Extracted features and improved classification using SVM models
- Increased accuracy of signal classification through optimized preprocessing
- Applied Agile methodology for project delivery
- Documented technical processes and results

ACADEMIC PROJECTS

GreenRecycle – 2024

- Developed an AI-powered web app for early plant disease and pest detection using Transfer Learning (InceptionV3, MobileNetV2) and YOLO for real-time recognition, with an interface to manage and display results.

Tools: Django, InceptionV3, MobileNetV2, YOLO, CNN, Transfer Learning

Social Network at Work for Universities – 2024

- Significantly improved the relevance and quality of user matches by architecting an AI-integrated social platform with intelligent user connections, automated CI/CD pipelines, and scalable containerized deployments
- Optimized reliability through JUnit, Sonar, and real-time Grafana/Prometheus monitoring.

Tools: React.js, Redux, Node.js, MongoDB, Django, AI, JWT, Tailwind, Flask
